

Bernardo Soriano - Software Architect

bsorianodev@gmail.com +1 347 326 1975

13 years in web and mobile platforms for investment banking, insurance, fin-tech, healthcare, and e-commerce.
Hands on leadership and architecture of tech products working with senior leadership in globally distributed teams.

Tech Advisor & Consultant at Renavest and other Startups, Austin TX - Remote

Jan 2023 - Now

- Led architecture and product development from scratch for full-stack cloud platforms used by thousands.
- Ran sprints, mentored devs organized work, prioritized features and development and deployment pipelines working with product and leadership.
- Built backend APIs in AWS with Typescript, Node, Express and PostgreSQL; integrated BetterAuth for secure authentication.
- Implementation of RAG with OpenAI and Anthropic APIs using Typescript with Node.js, and Next.js

Hybrid Mobile Developer at SSFCU [Mobile Banking - Web & Mobile], SAT TX - Remote

Jul 2021 - Jan 2023

- Developed interactive mobile banking applications using Angular, TypeScript, Rx.js, Javascript, Ionic, Azure, OAuth2, C#, .NET Core REST WS.
- Implemented unit testing with Jasmine and Karma and end to end testing using Cypress.js for multiple banking flows.
- Automated CI/CD for iOS apps using Azure DevOps and shell scripting.
- Diagnosed production issues (e.g., double payments), ensuring real-time resolution.

Principal Developer (VP), at Bank of New York Mellon [Wealth Mgmt Apps], NYC

Aug 2019 - Mar 2020

Led team pod to develop a dynamic data grid application, enabling wealth managers to categorize accounts, allocate and manage client's assets and securities, and generate financial reports. Reported directly to Tech and Product Directors; managed an offshore team for the deliveries.

- Delivered data grid app for wealth managers using Angular, GCP, MongoDB, Flask & OAuth-secured APIs.
- Developed javascript algorithms for handling state and manage business application logic used when allocating client's assets data.
- Created data visualizations using Chart.js for net worth and asset allocations.
- Created Flask and GraphQL APIs using REST web services accessed through an API Gateway to save and update net worth statements.

Senior Engineer at Boston Consulting Group [Healthcare & E-commerce], NYC

Mar 2018 - Jul 2019

Designed and developed new digital web and mobile platforms for BCG clients within healthcare and telecommunications industry. Cross-collaboration with experience designers, management consultants, product managers and agile coaches. Integration of REST web services from Spring APIs.

- Development of easy to use web and mobile applications using Angular, React, React Native, Oracle SQL, Nest.js, Java, Spring, AWS and Firebase.
- Developed design systems that support large applications using Angular, React.js, TypeScript and JavaScript, deployed to Unix based environments.
- Developed web components of an interactive healthcare platform using Javascript, NGRX, React, Styled components, CSS.

Software Engineer Team Lead at Accenture [BoA & Merrill Lynch], FL & NYC

Feb 2015 - Feb 2018

Worked with banking and investment clients on customer-facing and internal applications. Collaborated with the Director of Product and a Senior Tech Architect.(Used Backbone.js, Angular 1x, Angular 2+ with JavaScript, Rx.js, D3.js, LESS, CSS, SASS, Jasmine and RESTful web services).

- Developed new customer journeys for banking ATMs applications, providing users better ways to do deposits, process checks and transfer money.
- Developed dashboards for visualizing real time capital markets data using Angular.js to improve decision making for analysts at the trading floor.
- Developed web CRM platforms, offering better ways to manage risk, clients relationships and compliance for financial analysts.
- Developed new trading workflows from pre, during and post trade executions making easier to estimate and place trading orders.
- Led initiatives to create reusable web components to be used across multiple investment applications and offshore teams in India.

Lead Front-end Developer at IBM Interactive Experience [Web Banking], Mexico City

Mar 2014 - Feb 2015

Implemented an omni-channel transformation strategy for customer-facing banking with IBM Interactive Studio, improving the customer journey and becoming a public case study. Managed the local team and collaborated with the offshore team in Spain.

- Hired and led team (7) to deliver ~50 banking flows for transferring money between accounts, view account statements, etc. (Used HTML5, CSS3, Javascript, Dojo Toolkit, Grunt.js, Java Server Pages, IBM WebSphere Portal and the IBM Bank transformation toolkit).

Web & Mobile Developer at KTC Digital Agency [Mobile Insurance], Mexico City

Jan 2013 - Oct 2013

- Delivered iPad and Android Tablet applications that enabled insurance agents to offer insurance, wealth management products and manage customers information more efficiently. Customization of mobile geolocation and network device plugins (Used JavaScript, jQuery, Sencha Touch, Apache Cordova, iOS SDK and Android SDK).

B.S. Electronics, Telecoms and Computer Science - IPN.
